---

Sounds good Kent – watching from shore is fine.

**Subject:** Next week

Hi Gary,

Jason said the best tides will be on Wednesday and Thursday next week. I have asked him to collect the data on Thursday, so you can observe the field operation. They are using a relatively small boats, so there probably isn't room for you to be in the boat. So, if it is OK can you observe from the shoreline? I am sure our staff will be willing to describe to you how the entire system works.

Also, I do believe we have some bad weather coming into the area next week, so that might be a problem. We will keep you posted.

I will be at meetings at Longhorn on Thursday, so I will be out of touch most of the day. I will keep an eye on my cell phone (poor coverage at LHAAP for cell phones) when I am in locations where I can get a signal.
